Appeal for Peace by the Scouts of the Group Agesci San Donato 1 (Italy)

Welcome letter of peace's light from Bethlehem 2023

Making peace makes you happy

World's peace begins with us.

In this hard time marked by conflicts between Israel vs Palestine and Ukraine vs Russia we must ask ourselves how we can avoid the war and where we can find peace in our daily life.

The history has shown us the destructive effects of the war but man has never learnt from his mistakes.

We see new wars causing every day deaths, hate and discrimination. Everyday a thousand of families mourn the loss of their loved ones, they see destroyed what they all been worked for with love and sacrifice.

Everyday there are new wars which are distracting us from the ones that are on.

Peace is not only lack of conflicts, it is justice and equality.

We should strive for bridging gap between cultures and nations.

Peace begins in our hearts, by the capability of listening and respecting differences.

We must become artisans of peace in our daily life, change our gaze and observe the world with a kid eye with no prejudice and judgment.

The kid sees the world like a big house to discover, where he can express his feelings, feel free and be himself.

We must educate future generations to tolerance and respect values, so that they can contribute to a more peaceful world.

We will do our best for a better future.

We should focus on attempting to support pacifist organizations, participating in dialogue initiatives and promoting our own and others' awareness, in order to change the world we live in, OUR planet.

San Donato Milanese, 8th December 2023
